

What's going on in Lake Nipissing? Update

Friday, January 24, 2014 *by:* Kate Adams

There has been great debate around who owns the rights to the photo of 'Third Eye Louie' submitted to BayToday this morning and in the interest of fairness we would like to credit the correct individuals for taking the photo. Third Eye Louie was caught by Jimmy Stewart at his shack on Calander Bay January 19th along with his friend Chad Poitras and Brandon Warmington. Poitras has also provided two more photos of Louie. *****Derek Warmington was on a fishing expedition this past Sunday with his son Brandon Warmington on Lake Nipissing and what they reeled in has them scratching their heads and asking what is going on in the lake.

“My son caught a pickerel with a 3rd eye on last Sunday in Lake Nipissing,” he tells BayToday. “Is there a nuclear reactor or toxins in the lake to cause this?” He says the experience as very weird and the fish is truly ugly. “Lots of local anglers fishing have also caught something like this,” he notes.
